

Example 1 of a conceptual model

Issue: Mussel production and Water Framework Directive

Ref: Dinesen GE, Timmermann K, Roth E, et al (2011) Mussel production and water framework directive targets in the Limfjord, Denmark: an integrated assessment for use in system-based management. Ecol Soc 16

In the green rectangle is the environmental component of the model and concerns mussel growth. The red rectangle includes mussel harvest either through bottom dredging (fishing) or aquaculture (line mussels). This is the socio-economic component of the model.
